

Parents, Patrons, and Students

In an effort to keep IA students and staff as safe as possible, IA has purchased and installed Aerus Pure and Clean units in our classrooms and Aerus Hydroxyl Blasters in the Gym and Multipurpose Room. These units use active pure technology to remove viruses, flu, and other pathogens in the air. You can visit their website (www.activepure.com/covid/) and view information about the active pure technology. Know that our administration, faculty, and staff are doing our best to provide the safest environment possible. We are grateful for the cooperation of our students and teachers in wearing their masks and following our guidelines. We are also grateful for the support of our parents. We will continue to monitor changes in guidance from the CDC, government, and our local health care professionals. Being in school is paramount to the progression of student learning and IA is pleased to have this new equipment in place to help our students, teachers, staff, and visitors.
